

Kookaburra Gully

**An imminent new, world-class, high grade, low cost
graphite mine
on SA's southern Eyre Peninsula**

Mining Lease Granted June 2016

Managing Director's Presentation
2016 Annual General Meeting
8 November 2016
ASX : LML

Kookaburra Gully
proposed mine site

Key investment appeal

Mineral Lease granted 3rd June 2016 for flagship Kookaburra Gully project

- Located in South Australia's **world-class graphite-rich metallogenic province** of Eyre Peninsula 35kms north of export gateway of Port Lincoln – region's graphite profile comparable to iron ore's dominant Pilbara profile
- Deposit hosts **high grade flake graphite – a global Top 10 graphite deposit**
- **Set to be Australia's premier and only producing graphite mine**
- **Targeting ~40,000 tonnes per annum high purity graphite concentrate** (up to 98% TGC) from conventional flotation and easily upgraded to 99.9% TGC
- **Targeting development start-up as soon as next year 2017**
- Existing water, power, road/rail/sea export infrastructure close-by
- **Entering a multi-billion dollar “new era” expanding global graphite market**

Investment options: mine financing, off-take, direct equity or provision of environmental/engineering/mining/processing solutions & equipment

Project owner: Lincoln Minerals Limited

Focused Board and Management
Considerable experience in Chinese investment & markets

Non-Executive Chairman - Mr Jin Yubo
Managing Director - Dr Allan John Parker
Non-Executive Director - Mr Eddie Lung Yiu Pang
Non-Executive Director - Mr James Tenghui Zhang

- Unwavering, long-term focus on owning, developing and profitably extracting the multi-commodity mineral wealth of South Australia's richly endowed Eyre Peninsula
- Graphite is the main strategic investment
- Other assets include substantial magnetite and hematite resources and copper targets in a region with a long history of graphite, iron ore and copper mining

ASX Code	LML
Market Capitalisation	A\$16.2 million
Shares on issue	368.4 million
52 Week range	\$0.03 – \$0.08
Cash at 30 Sept 2016	A\$2.43 million
Debt	NIL
Tenement holdings	2,980 km ²

Kookaburra Gully: a world class address

Canada's renowned Fraser Institute (March 2016) put **South Australia in the Top 10 mining jurisdictions in the world** for its mining investment attractiveness (mineral endowments and public policy) for resources investors.

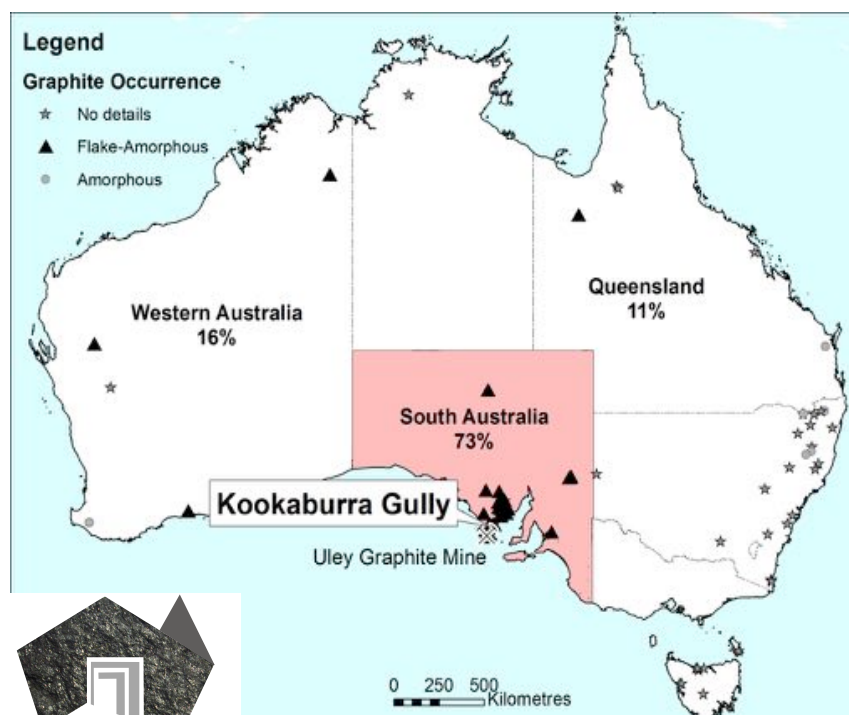

World Class Location

SA hosts over 70% of Australia's JORC graphite resources

Eyre Peninsula: highly prospective for world-class graphite

Includes Lincoln's 100%-owned Kookaburra Gully

SA graphite royalties 2% for the first 5 years (then 3.5%)

World Class JORC resource

Highly sought after premium flake graphite

Kookaburra Gully
2.2 Mt @ 15.1% TGC*

Adjoining Koppio
1.85 Mt @ 9.8% TGC*

Total contained graphite
512,511 tonnes*

Kookaburra Gully is a **Top 10 global graphite resource** including China based on grade

Mt = million tonnes

TGC = Total Graphitic Carbon

** at 5% TGC cutoff*

Kookaburra Gully: a world class deposit

Graphite schist outcrops
at the surface

Drilling by Lincoln
in 2013-14 proved
up a high grade
JORC mineral
resource

Deposit	Combined Inferred & Indicated JORC Mineral Resource	Grade %TGC	Contained Graphite
Kookaburra Gully	2.2 million tonnes	15.1%	331,778 tonnes
Koppio	1.85 million tonnes	9.8%	180,733 tonnes

*Petrological studies show Kookaburra Gully graphite
as fine to coarse flakes with an average graphite
flake size of 350-500 microns*

Coarse flake graphite

100µm

Key Mining Lease Granted

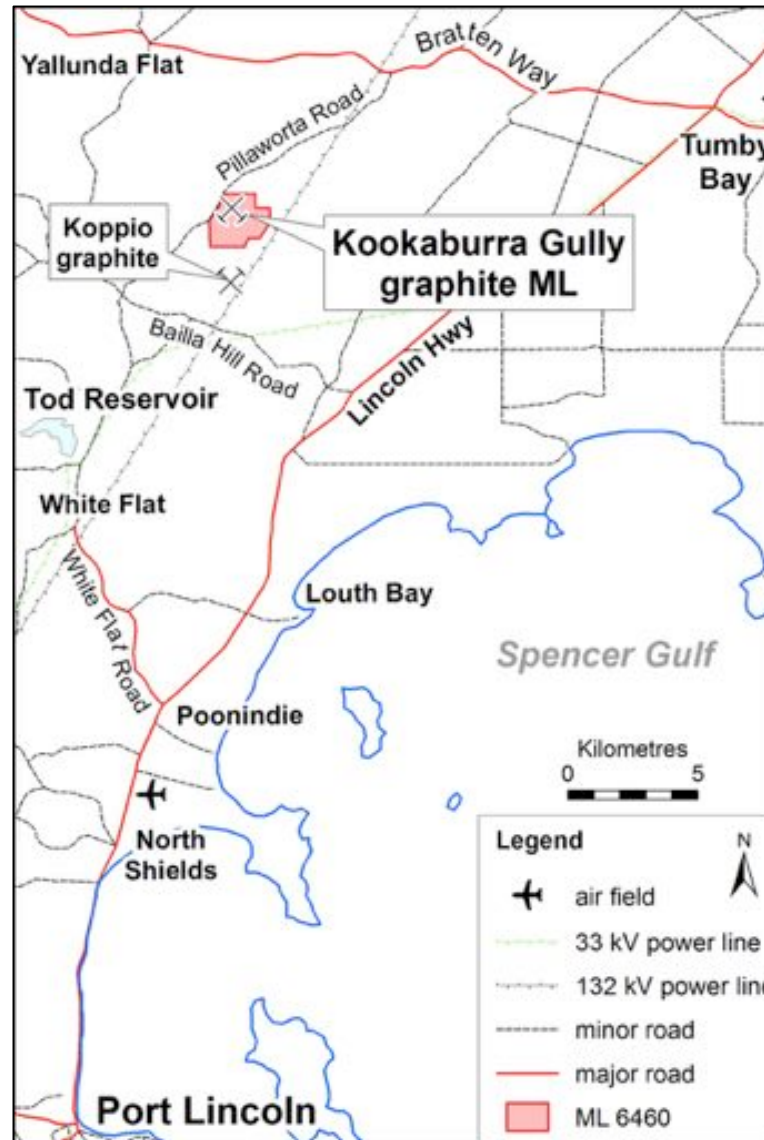

Mineral Lease
ML 6460

**Granted
3 June 2016**

Preparation &
approval of Program
for Environment
Protection &
Rehabilitation (PEPR)
is final approval
process

Targeting
Development
2017-18

*(subject to Govt approvals
& finance)*

- Has green light from Commonwealth Government Department of the Environment – **Not a Controlled Action**
- Capex <A\$50 million
- LOM Opex A\$630/t to A\$704/t concentrate (*)
- Water: 10km from Tod Reservoir + pit dewater
- Power: 5km from grid &/or onsite generation
- Export from Port Lincoln (35km) or Port Adelaide

() 90% recovery
FOB Port Adelaide
Refer 2015 Annual Report*

April 2016

Key MoU Signed with District Council

- **Memorandum of Understanding (MoU) with the District Council of Tumby Bay (DCTB) jointly signed on 6 April 2016**
- **Supports the Company's Kookaburra Gully graphite project**
- Framework to work together on proposed water pipeline from Tod Reservoir, upgrading and maintenance of roads, preparation of a Traffic Management Plan, and continuing engagement with the community in regard to business and employment opportunities
- MoU shows the willingness of Council and Lincoln Minerals to collaborate to achieve maximum benefits for this new mining opportunity for the Tumby Bay region

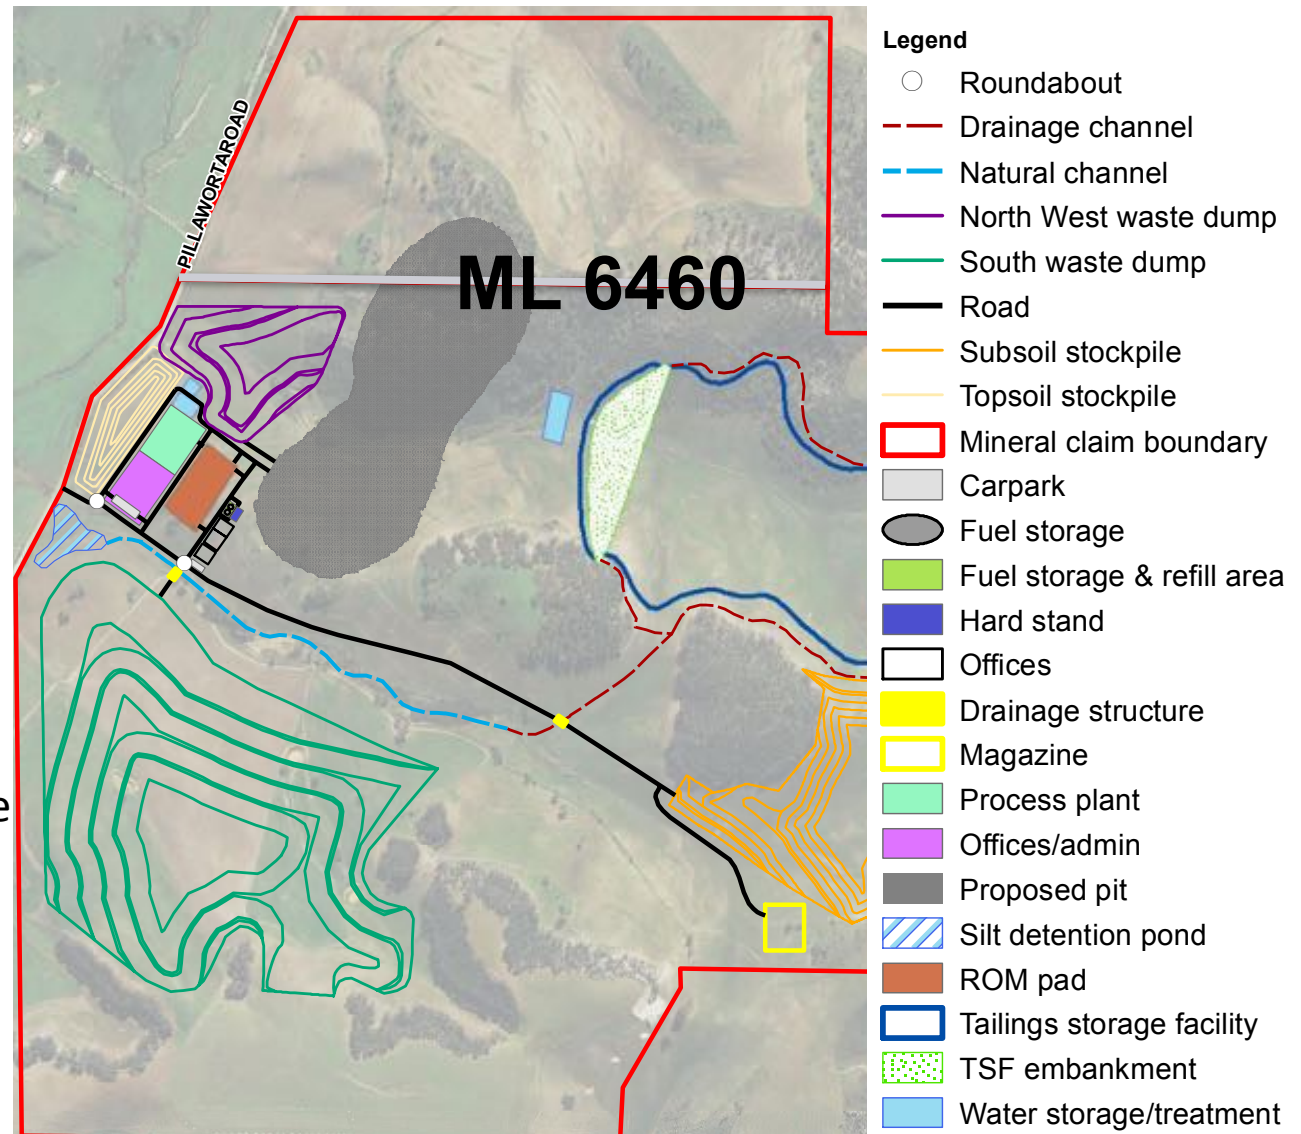

*Signing of the MoU with DCTB (from left)
DCTB Mayor Sam Telfer, DCTB CEO Trevor Smith,
LML MD Dr John Parker & LML Chairman Yubo Jin*

Small Mine Site Footprint

- Small mine site footprint 103 hectares
- 700m long open pit graphite mine
- Conventional flotation plant operating 24/7
- Process 250,000 tpa ore
- Produce up to 40,000 tpa concentrate
- High metal recovery (>85%)
- Delivers high grade (94-98% TGC) concentrate
- Chemical leaching to 99.95% TGC
- Packaging – bulka bags or containers

Kookaburra Gully – Simple Processing

- Simple process flow sheet – grind, float, regrind, clean, dry, screen & export
- Delivers high grade (94-98% TGC) flake graphite concentrate from a simple “clean-and-green” process

Program for Environment Protection & Rehabilitation (PEPR) in progress

- Final stage in Government approvals process
- Includes numerous options studies re power & water supply, transport, metallurgy
- New laboratory & pilot plant test work in Australia and China (2016) includes:
 - Larger samples (up to 5 tonnes)
 - Lock-cycle tests
 - **High purity spherical graphite & expandable graphite tests**
- Transport Options: road to, then ship out of Port Lincoln, Whyalla or Port Adelaide

97.8% TGC coarse flake graphite from Kookaburra Gully

Kookaburra Gully Graphite Project

World Class Resource Upside

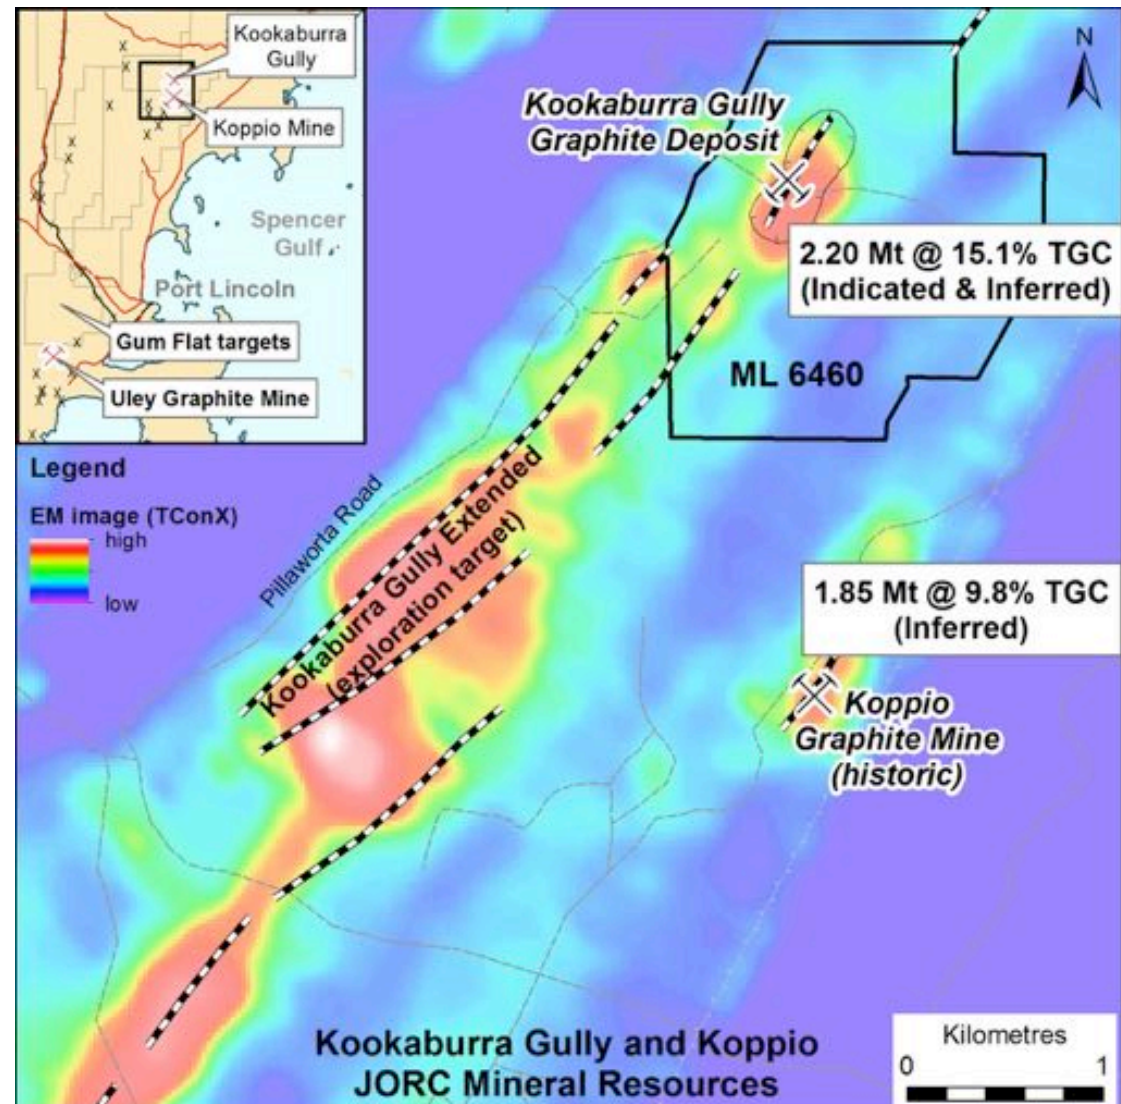

Exploration Targets:

- Kookaburra Gully Extended Exploration Targets:
22 Mt – 44 Mt @ 10%-15% TGC
- Drilling program planned for early 2017
- Other Exploration Targets:
Gum Flat-Uley area & further along strike from Kookaburra Gully

Long Project Mine Life and Enhanced Production Rate

It is emphasised that Exploration Target tonnage estimates are entirely conceptual in nature. There has been insufficient or no drilling in the immediate areas of those targets and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

Graphite Market Fundamentals

- Graphite in the form of **Spherical Graphite** is a key input in the manufacture of lithium-ion batteries widely used in **electric vehicles**, smart phones, portable computer devices and more – **battery backup for solar powered homes**
- **Expandable Graphite** used in fire extinguishers and for making graphite foil
- **Graphite Foil** widely used for gaskets (eg engine head gaskets), as a thermal barrier in electrical applications, fuel cells and linings
- Graphite is also used in pencils, for dry lubricants, steelmaking, pebble-bed nuclear reactors and much more including **new generation solar-thermal power systems**
- In the proposed Solastor system, a tower mounted, 10 tonne graphite block is heated to 800°C and used to convert water to steam to generate electricity. For the Port Augusta solar-thermal power station proposal, at least 1700 graphite blocks or more than 17,000 tonnes of graphite would be required.

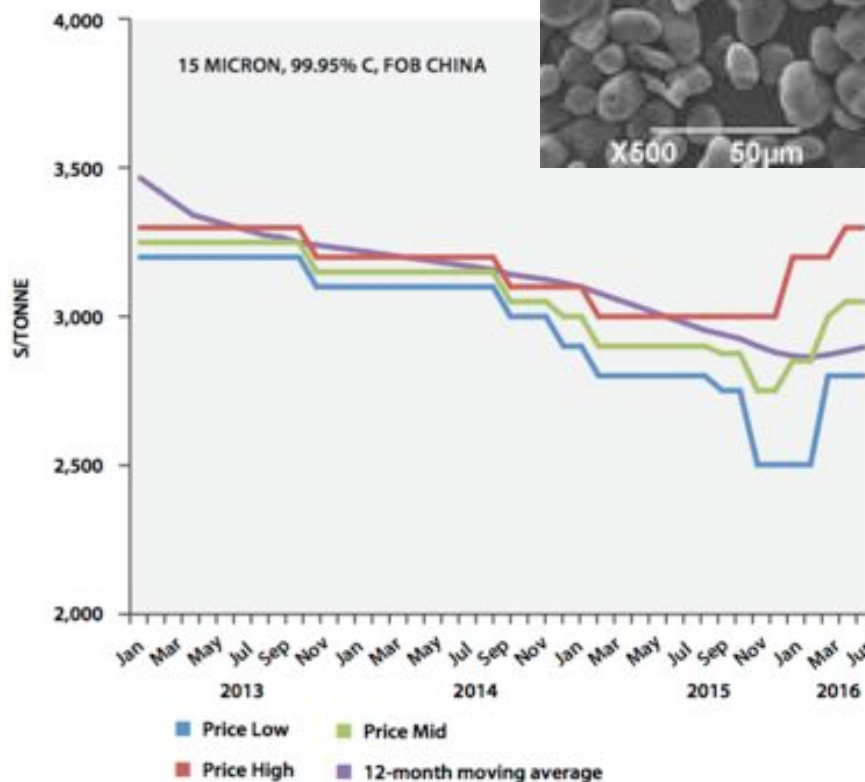

www.solastor.com.au

Spherical Graphite Fundamentals

BATTERY & ENERGY STORAGE COMMERCIALISATION

- Newgen electric cars – use and demand growing by at least 15%
- Massive emerging market for non-mobile battery storage systems for homes
- It takes about 2.5 tonnes of natural flake graphite to produce 1 tonne spherical graphite
- Spherical graphite is high purity >99.9% C
- About 50-60% of spherical graphite comes from natural flake graphite

Source: Benchmark Mineral Intelligence

Timescale to Production

Lincoln Minerals Limited

Emerging Graphite Producer

Summary and Key Deliverables

- **Focused graphite developer** with Australia's highest quality graphite deposit
- **Milestone Mining Lease granted for Kookaburra Gully**
 - Crystallises offtake/project funding opportunities
 - **Australia's next graphite mine** (subject to government approvals and finance)
- **World class high-grade graphite deposit**
 - High purity concentrates up to 98% TGC produced by conventional flotation
 - Readily upgraded to 99.9% TGC
 - Located in recognised **mining friendly jurisdiction** in close proximity to necessary infrastructure (water, power, transport and shipping)
 - Low capital investment and estimated operating costs
- **Near-term "clean-and-green" production**
- **Experienced Directors with considerable experience in international Chinese investment & markets**

2017 in a nutshell....

**Kookaburra Gully to become....
SA's newest mine in one of the
hottest global commodities
The only producing graphite mine in Australia
in a soaring new era global market**

THANK YOU

Dr A. John Parker
Managing Director

Kookaburra Gully
proposed mine site

Important Notice

This presentation has been prepared by Lincoln Minerals Limited ("LML") and Australian Graphite Pty Ltd ("AGL") as an aid to a spoken explanation. It should not be considered as an offer or invitation to subscribe for or purchase any securities in LML or AGL nor as an inducement to make an offer or invitation with respect to those securities. AGL is a wholly-owned subsidiary of LML; all rights and interests in graphite minerals and associated minerals in certain tenements are assigned to AGL. Information in this presentation is a professional opinion only but is given in good faith.

Forward-Looking Statements

This presentation contains forward looking statements concerning the Kookaburra Gully Graphite Project. Statements concerning Mineral Resources, mine plans and project economics may be deemed to be forward looking statements in that they involve estimates based on specific assumptions. Forward-looking statements are not statements of historical fact, and actual events and results may differ materially from those described in the statements as a result of a variety of risks, uncertainties and other factors. Forward looking statements are based on AGL's and LML's beliefs, opinions and estimates as of the date the statements are made and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments. Data and amounts shown in this presentation relating to capital costs, operating costs, graphite prices and project timelines are based on consultant reports and internally generated estimates and are best estimates only. Accordingly, AGL and LML cannot guarantee the accuracy and/or completeness of the figures or data included in the presentation. All dollar amounts are in Australian dollars unless otherwise stated.

Competent Person's Statement

Information in this presentation that relates to exploration activity, mineral resources and results was compiled by Dr A J Parker who is a Member of the Australasian Institute of Geoscientists. Dr. Parker is Managing Director of and has shares in Lincoln Minerals Limited. He has sufficient experience relevant to the styles of mineralisation and to the activities which are being presented to qualify as a Competent Person as defined by the JORC code, 2012. Dr. Parker consents to the release of the information compiled in this presentation in the form and context in which it appears.

Appendix

This presentation has been prepared by Lincoln Minerals Limited ("LML") as an aid to a spoken explanation. The information contained in this presentation is based on a number of public statements, Quarterly Reports and ASX releases made by LML:

Information extracted from previously published reports identified in this report is available to view on the Company's website www.lincolnminerals.com.au. The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Experienced Chinese Directors

- **Mr Jin Yubo: Non-Executive Chairman**

Has a Master of International Law from National Chi Nan University, a chairman or board member of investment and real estate companies in China and Australia, a former committee member of a major Chinese city's People's Political Consultative Council, familiar with Chinese investment laws and regulations and has a wide range of political and business networks in mainland China, Hong Kong and other eastern and South East Asian countries.

- **Mr Eddie Pang: Non-Executive Director**

Has a Bachelor of Science with Honours degree in Chemistry, operates a Shanghai trading business supplying the Chinese market with Australian wool and wine, Chilean iron ore, cathode copper and timber, and exports Chinese products to Vietnam, the UAE and Canada. He is currently the Executive Chairman of ASX-listed mineral exploration and development company, Genesis Resources Limited.

- **Mr James Zhang: Non-Executive Director**

Over 20 years in real estate development and business management in mainland China, Hong Kong and Australia with extensive experience in funding real estate, infrastructure and property development and enterprise management. He is Director of Shanghai Jihai Investment Ltd Co. and member of Asset Management Association of China (AMAC).

Considerable experience in international Chinese investment & markets

In world Top 10 graphite deposits by grade

Kookaburra Gully is a **high grade coarse flake graphite deposit** and is capable of delivering near-term production at low cost in addition to graphene development research with Melbourne's Monash University and Guangdong University of Technology in China

"Kookaburra Gully is within the Top 10 global resources including China based on graphite grade."

TGC = Total Graphitic Carbon

Kookaburra Gully Metallurgy
